

2016 Northern Utah Interagency Incident Organizer

Prior to responding to an incident obtain the following information:

WildCAD Number	
Descriptive Location	
Command Freq.	
Tactical Freq.	
Air to Ground Freq.	
Air to Air Freq. (as needed)	

Relay the following information to dispatch upon first visual contact:

Descriptive Location or Legal	
Incident Name	
Size (in acres)	
Spread Potential	Low Moderate High
Values Threatened	None Structures Others Life

Complete the following table before submitting:

Incident Name	
Fire Code(s)	
Final Incident Commander	
Fire Report Completion Date	

The final IC will submit the Incident Organizer along with all other associated documentation to the Zone FOS/FMO/AFMO responsible for the incident.

All GPS coordinates are WGS84 Datum, Degrees Decimal Minutes

To: Type 3, 4 and 5 Incident Commanders

From: Northern Utah Interagency Agency Administrators

Subject: Delegation of Authority for Type 3, 4 and 5 Incident Commanders

The following list of expectations and responsibilities will help each of you for the role of Incident Commander:

- **Firefighter and public safety is the highest priority on every fire.**
- Only commit responders to operations when and where they can be successful, and under conditions where important values actually at risk are protected with the least exposure necessary.
- Coordinate with the Duty Officer/Agency Administrator to implement the 5 R's: Right plan, Right place, Right time, Right assets and Right duration.
- Follow the procedure for completing this Incident Organizer as outlined in the table of contents.
- Develop, implement, and monitor safe and effective Incident Action Plan objectives which reflect local fire and resource management goals. If a Wildland Fire Decision Support System (WFDSS) is completed, use it as a guide for Incident Action Plan development.
- Disengage suppression activities immediately if strategies, tactics, and communications cannot be maintained safely.
- Maintain command and control of the incident at all times.
- Identify and protect Point of Origin.
- Document any transfer of command on Unit Log ICS form 214; relay this information to all fire line personnel and the Northern Utah Interagency Fire Center (NUIFC).
- Give complete briefings to fire line personnel (see the *Incident Response Pocket Guide*).
- Document all briefings on the resource summary log.
- Complete the Incident After Action Review.
- **Do not assume collateral duties** as a Type 3 Incident Commander.
- Implement the Risk Management Process, as outlined in the *Incident Response Pocket Guide*.
- Monitor fatigue levels; ensure that work/rest policy is adhered to.

We have the utmost respect for your knowledge and professionalism. You serve in an extremely important leadership role with critical responsibilities. Please understand that your actions will be supported in situations where you take appropriate precautions to safeguard firefighters and the public.

**This is located in the 2016 NUIFC AOP as Appendix F which is authorized annually.*

FIELD FIRE REPORT

FIRE NAME: _____ **FIRE NUMBER:** _____

DATE: _____ **TIME:** _____

INCIDENT COMMANDER: _____

DESCRIPTIVE LOCATION: _____

LEGAL: Township _____ Range _____ Section (s) _____

COORD (At PoO): LAT: Deg _____ Dec.Min. _____ LONG: Deg _____ Dec.Min. _____

OWNERSHIP(s): _____ **ESTIMATED SIZE:** _____ acres

CAUSE: Natural ___ Human ___ PoO Protected: Yes ___ No ___ → Fire Investigator (name): _____

ESTIMATED CONTAINMENT: DATE: _____ TIME: _____

ESTIMATED CONTROL: DATE: _____ TIME: _____

VALUES THREATENED: ☐ N NO ☐ Y YES (specify: _____)

CONTROL PROBLEMS: ☐ N NO ☐ Y YES (specify: _____)

ADDITIONAL RESOURCES NEEDED: ☐ N NO ☐ Y YES (specify: _____)
SPREAD POTENTIAL:

☐ 1 Low ☐ 2 Moderate ☐ 3 High ☐ 4 Extreme

FIRE BEHAVIOR:

☐ 1 Smoldering ☐ 3 Running ☐ 5 Torching ☐ 7 Crowning/Spotting

☐ 2 Creeping ☐ 4 Spotting ☐ 6 Crowning ☐ 8 Erratic

FLAME LENGTH (Average flame length at head of fire): _____ feet

WIND SPEED _____ MPH **WIND DIRECTION** N S E W NW NE SW SE

TOPOGRAPHY (Topography in vicinity of fire origin):

☐ 1 Ridgetop ☐ 4 Middle 1/3 of slope ☐ 7 Valley Bottom
☐ 2 Saddle ☐ 5 Lower 1/3 of slope ☐ 8 Mesa or plateau
☐ 3 Upper 1/3 of slope ☐ 6 Canyon Bottom ☐ 9 Flat or rolling

SLOPE (Percent slope in vicinity of fire origin):

☐ 1 0-25% ☐ 2 26-40% ☐ 3 41-55% ☐ 4 56-75% ☐ 5 76+%

FBPS FUEL MODEL:

☐ 1 Short Grass (1 ft) ☐ 5 Brush (2 ft) ☐ 9 Hardwood Litter
☐ 2 Timber w/ Grass Understory ☐ 6 Dormant Brush ☐ 10 Timber (Litter & Understory)
☐ 3 Tall Grass (3 ft) ☐ 7 Southern Rough ☐ 11 Light Logging Slash
☐ 4 Chaparral/Brush (6 ft) ☐ 8 Closed Timber Litter ☐ 12 Medium Logging Slash

ASPECT: (Circle) N S E W NW NE SW SE

ELEVATION: Top _____ feet. Bottom _____ feet.

STAGING AREA LOCATION: _____

LCES SAFETY CHECKLIST

Safety Concerns: ☐ NO ☐ YES (Specify _____)

Ensure all GPS coordinates are WGS84 Datum, Degrees Decimal Minutes

FINAL FIRE REPORT DATA

The information from this sheet will be used to complete agency specific Fire Reports

Wildland Fire Risk and Complexity Assessment

The Wildland Fire Risk and Complexity Assessment should be used to evaluate firefighter safety issues, assess risk, and identify the appropriate incident management organization. Determining incident complexity is a subjective process based on examining a combination of indicators or factors. An incident's complexity can change over time; incident managers should periodically re-evaluate incident complexity to ensure that the incident is managed properly with the right resources.

Instructions:

Incident Commanders should complete Part A and Part B and relay this information to the Agency Administrator. If the fire exceeds initial attack or will be managed to accomplish resource management objectives, Incident Commanders should also complete Part C and provide the information to the Agency Administrator.

Part A: Firefighter Safety Assessment

Evaluate the following items, mitigate as necessary, and note any concerns, mitigations, or other information.

Evaluate these items	Concerns, mitigations, notes
LCES	
Fire Orders and Watch Out Situations	
Multiple operational periods have occurred without achieving initial objectives	
Incident personnel are overextended mentally and/or physically and are affected by cumulative fatigue.	
Communication is ineffective with tactical resources and/or dispatch.	
Operations are at the limit of span of control.	
Aviation operations are complex and/or aviation oversight is lacking.	
Logistical support for the incident is inadequate or difficult.	

Part B: Relative Risk Assessment

Values				Notes/Mitigation
<u>B1. Infrastructure/Natural/Cultural Concerns</u> Based on the number and kinds of values to be protected, and the difficulty to protect them, rank this element low, moderate, or high. Considerations: key resources potentially affected by the fire such as urban interface, structures, critical municipal watershed, commercial timber, developments, recreational facilities, power/pipelines, communication sites, highways, potential for evacuation, unique natural resources, designated areas (i.e. wilderness), T&E species habitat, and cultural sites.	L	M	H	
<u>B2. Proximity and Threat of Fire to Values</u> Evaluate the potential threat to values based on their proximity to the fire, and rank this element low, moderate, or high.	L Far	M	H Near	
<u>B3. Social/Economic Concerns</u> Evaluate the potential impacts of the fire to social and/or economic concerns, and rank this element low, moderate, or high. Considerations: impacts to social or economic concerns of an individual, business, community or other stakeholder; degree of support for the wildland fire program and resulting fire effects; other fire management jurisdictions; tribal subsistence or gathering of natural resources; air quality regulatory requirements; public tolerance of smoke, including health impacts; potential for evacuation and ingress/egress routes; and restrictions and/or closures in effect or being considered.	L	M	H	
Hazards				Notes/Mitigation
<u>B4. Fuel Conditions</u> Consider fuel conditions ahead of the fire and rank this element low, moderate, or high. Evaluate fuel conditions that exhibit high ROS and intensity for your area, such as those caused by invasive species or insect/disease outbreaks; and/or continuity of fuels.	L	M	H	
<u>B5. Fire Behavior</u> Evaluate the current and expected fire behavior and rank this element low, moderate, or high. Considerations: intensity; rates of spread; crowning; profuse or long-range spotting.	L	M	H	
<u>B6. Potential Fire Growth</u> Evaluate the potential fire growth, and rank this element low, moderate, or high. Considerations: Considerations would include current and expected fire growth based on fire behavior analysis and the weather forecast and/or the ability to control the fire.	L	M	H	
Probability				Notes/Mitigation
<u>B7. Time of Season</u> Evaluate the potential for a long-duration fire and rank this element low, moderate, or high. Considerations: time remaining until a season ending event.	L Late	M Mid	H Early	
<u>B8. Barriers to Fire Spread</u> Evaluate the barriers to fire spread and their potential to limit fire growth, and rank this element low, moderate, or high. Considerations: If many natural and/or human-made barriers are present, rank this element low. If some barriers are present, rank this element moderate. If no barriers are present, rank this element high.	L Many	M	H Few	
<u>B9. Seasonal Severity</u> Evaluate fire danger indices and rank this element low/moderate, high, or very high/extreme. Considerations: Fire danger indices such as energy release component (ERC); drought status; live and dead fuel moistures; fire danger indices; adjective fire danger rating; geographic area preparedness level.	L/M	H	VH/E	
Enter the number of items circled for each column.				

Relative Risk Rating (circle one):

Low	Majority of items are "Low", with a few items rated as "Moderate" and/or "High".
Moderate	Majority of items are "Moderate", with a few items rated as "Low" and/or "High".
High	Majority of items are "High"; A few items may be rated as "Low" or "Moderate".

Part C: Organization

Relative Risk Rating (From Part B)					
Circle the Relative Risk Rating (from Part B).		L	M	H	
Implementation Difficulty					Notes/Mitigation
<u>C1. Potential Fire Duration</u> Evaluate the estimated length of time that the fire may continue to burn if no action is taken and amount of season remaining. Rank this element low, moderate, or high. Note: This will vary by geographic area.	N/A Very Short	L Short	M	H Long	
<u>C2. Incident Strategies (Course of Action)</u> Evaluate the level of firefighter and aviation exposure required to successfully meet the current strategy and implement the course of action. Rank this element as very low, low, moderate, or high. Consider the likelihood that those resources will be effective; exposure of firefighters; reliance on aircraft to accomplish objectives; and whether there are clearly defined trigger points.	Very Low	L	M	H	
<u>C3. Functional Concerns</u> Evaluate the need to increase organizational structure to adequately and safely manage the incident, and rank this element very low (minimal resources committed), low (adequate), moderate (some additional support needed), or high (current capability inadequate). Considerations: Incident management functions (logistics, finance, operations, information, planning, safety, and/or specialized personnel/equipment) are inadequate and needed; availability of resources; access to EMS support; heavy commitment of local resources to logistical support; ability of local businesses to sustain logistical support; substantial air operation which is not properly staffed; worked multiple operational periods without achieving initial objectives; incident personnel overextended mentally and/or physically; Incident Action Plans, briefings, etc. missing or incomplete; performance of firefighting resources affected by cumulative fatigue; and ineffective communications.	Very Low	L	M	H	
Socio/Political Concerns					Notes/Mitigation
<u>C4. Objective Concerns</u> Evaluate the complexity of the incident objectives and rank this element very low, low, moderate, or high. Considerations: clarity; ability of current organization to accomplish; disagreement among cooperators; tactical/operational restrictions; complex objectives involving multiple focuses; objectives influenced by serious accidents or fatalities.	Very Low	L	M	H	
<u>C5. External Influences</u> Evaluate the effect external influences will have on how the fire is managed and rank this element very low, low, moderate, or high. Considerations: limited local resources available for initial attack; increasing media involvement, social/print/television media interest; controversial fire policy; threat to safety of visitors from fire and related operations; restrictions and/or closures in effect or being considered; pre-existing controversies/ relationships; smoke management problems; sensitive political concerns/interests.	Very Low	L	M	H	
<u>C6. Ownership Concerns</u> Evaluate the effect ownership/jurisdiction will have on how the fire is managed and rank this element very low, low, moderate, or high. Considerations: disagreements over policy, responsibility, and/or management response; fire burning or threatening more than one jurisdiction; potential for unified command; different or conflicting management objectives; potential for claims (damages); disputes over suppression responsibility.	Very Low	L	M	H	
Enter the number of items circled for each column.					

Part C: Organization (continued)

Recommended Organization (circle one):

Type 5	Majority of items rated as “Very Low”; a few items may be rated in other categories.
Type 4	Majority of items rated as “Low”, with some items rated as “Very Low”, and a few items rated as “Moderate” or “High”.
Type 3	Majority of items rated as “Moderate”, with a few items rated in other categories.
Type 2	Majority of items rated as “Moderate”, with a few items rated as “High”.
Type 1	Majority of items rated as “High”; a few items may be rated in other categories.

Rationale:

Use this section to document the incident management organization for the fire. If the incident management organization is different than the Wildland Fire Risk and Complexity Assessment recommends, document why an alternative organization was selected. Use the “Notes/Mitigation” column to address mitigation actions for a specific element, and include these mitigations in the rationale.

Name of Incident:_____ Unit(s):_____

Date/Time:_____ Signature of Preparer:_____

Incident Commander Checklist

- ☐ Verify all frequencies assigned (if radio coverage is poor on the assigned frequency work with the NUIFC to find a frequency that will work better) and all units responding to the incident.
- ☐ Name the incident (use the closest geographical reference and keep the name short) and obtain an alpha numeric incident code from NUIFC.
- ☐ Flag the route to the incident (red and white striped flagging for BLM). Start from major roads and clearly flag each turn on both sides of road.
- ☐ Designate a briefing and staging area. All resources will check in with the IC and get briefed.
- ☐ Post lookouts, ensure communications work and identify escape routes and safety zones.
- ☐ Coordinate with State/County Fire Wardens to account for all fire department resources. Make contact on State Fire Marshall 154.280 Tx/Rx Narrowband.
- ☐ Complete the Initial Size-up Briefing on the Initial Field Fire Report and relay this information to NUIFC on a command frequency.
- ☐ Complete the Incident Complexity Analysis. Ensure the proper management level is in place or on order.
- ☐ Develop objectives for the incident in coordination with the jurisdictional Duty Officer. Utilize strategies and tactics that are safe and have achievable objectives. All type 3 incidents require a written IAP. Incident objectives should be consistent with the resource objectives outlined in management plans.
- ☐ When the fire is suspected to be human caused; complete the Fire Cause Determination Report and protect the point of origin.
- ☐ Determine the point of origin and relay coordinates to NUIFC to identify ownership. Ensure all GPS coordinates are WGS84 datum, Degrees Decimal Minutes (DD MM.MMM).
- ☐ Establish unified command when appropriate. Ensure NUIFC and all resources on the incident know who the incident commander is at all times.
- ☐ Plan for operational resources needed to control the incident.
- ☐ Order the necessary and appropriate operational resources through NUIFC by 2000 for the next operational period.

Incident Commander Checklist (continued)

- ☐ Ensure current or planned air operations have appropriate air support function. Contact duty officer and/or local Unit Aviation Manager (UAM) or Forest Aviation Office (FAO) for advice on additional air support.
- ☐ Ensure all contract resources are inspected through NUIFC/Cache prior to obtaining an assignment.
- ☐ NUIFC will coordinate with county dispatch centers for EMS and local law enforcement issues upon request.
- ☐ Complete the Spot Weather Forecast Request and relay the information to NUIFC. Request a spot weather forecast for each operational period that the fire is uncontrolled or if a Red Flag Warning/Fire Weather Watch has been issued.
- ☐ Confirm with NUIFC that the jurisdictional duty officer has been briefed.
- ☐ Notify NUIFC as soon as it looks like the incident will go past 1830 and extended staffing will be needed.
- ☐ An Incident Status Summary (ICS-209) will be submitted to NUIFC by 1800 for all active fires reaching the 100(timber)/300(grass/brush) criteria OR if the fire is not going to be suppressed but managed for long duration. Long duration is more than 72 hours. Submit a final 209 when the fire is contained or controlled AND national resources are no longer being ordered by the incident OR the fire is declared out.
- ☐ Order logistical resources needed to support the incident through NUIFC.
- ☐ Facilitate incident AARs after each operation period. Document a final incident AAR (in the Incident Organizer page 25) after the fire is controlled.
- ☐ Any resources not able to arrive at their home unit by 2200 after completing a shift on a fire, may need to RON at the incident or within close proximity. Notification will be made to the duty officer of this instance. Local cooperators may be exempt with duty officer approval.
- ☐ Complete all appropriate crew time reports (CTR), shift tickets and evaluations for all off unit resources prior to their demobilization.
- ☐ Keep NUIFC informed on changes in conditions/personnel.
- ☐ Release resources accounting for driving limits and work/rest issues. Coordinate demobilization with jurisdictional duty officer for in demand resources.
- ☐ Complete the Final Fire Report Data form in the Incident Organizer when the incident is declared out.

Medical Incident Report					
FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use items one through nine to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS/DISPATCH <i>Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)</i>					
2. INCIDENT STATUS: <i>Provide incident summary and command structure.</i>					
Nature of Injury/Illness		<i>Describe the injury (Ex: Broken leg with bleeding)</i>			
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>			
Incident Commander		<i>Name of IC</i>			
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>			
3. INITIAL PATIENT ASSESSMENT: <i>Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.</i>					
Number of Patients:	Male / Female	Age:	Weight:		
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!					
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> NO = MEDEVAC!					
Mechanism of Injury: <i>What caused the injury?</i>					
Lat/Long (Datum WGS84) <i>Ex: N 40° 42.45' x W 123° 03.24'</i>					
4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY					
SEVERITY			TRANSPORT PRIORITY		
<input type="checkbox"/> URGENT-RED Life threatening injury or illness. <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>			Ambulance or MEDEVAC helicopter. Evacuation need is IMMEDIATE.		
<input type="checkbox"/> PRIORITY-YELLOW Serious Injury or illness. <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>			Ambulance or consider air transport if at remote location. Evacuation may be DELAYED.		
<input type="checkbox"/> ROUTINE-GREEN Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>			Non-Emergency. Evacuation considered Routine of Convenience.		
5. TRANSPORT PLAN:					
Air Transport: (Agency Aircraft Preferred)					
<input type="checkbox"/> Helispot		<input type="checkbox"/> Short-haul/Hoist		<input type="checkbox"/> Life Flight	
				<input type="checkbox"/> Other	
Ground Transport:					
<input type="checkbox"/> Self-Extract		<input type="checkbox"/> Carry-Out		<input type="checkbox"/> Ambulance	
				<input type="checkbox"/> Other	
6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:					
<input type="checkbox"/> Paramedic/EMT(s)		<input type="checkbox"/> Crew(s)		<input type="checkbox"/> SKED/Backboard/C-Collar	
<input type="checkbox"/> Burn Sheet(s)		<input type="checkbox"/> Oxygen		<input type="checkbox"/> Trauma Bag	
<input type="checkbox"/> Medication(s)		<input type="checkbox"/> IV/Fluid(s)		<input type="checkbox"/> Cardiac Monitor/AED	
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)

12 hours:							
24 hours:							
48 hours:							
72 hours:							
Anticipated after 72 hours:							
37. Strategic Objectives (define planned end-state for incident):							
ICS 209, Page 2 of ____							
* Required when applicable.							

Additional Incident Decision Support Information (continued)

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts.

12 hours:

24 hours:

48 hours:

72 hours:

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours:

24 hours:

48 hours:

72 hours:

Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) Critical resource needs identified above,
- 2) The Incident Action Plan and management objectives and targets,
- 3) Anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

41. Planned Actions for Next Operational Period:

42. Projected Final Incident Size/Area (use unit label – e.g., “sq mi”):

43. Anticipated Incident Management Completion Date:

44. Projected Significant Resource Demobilization Start Date:

45. Estimated Incident Costs to Date:

46. Projected Final Incident Cost Estimate:

47. Remarks (or continuation of any blocks above – list block number in notation):

Incident Resource Commitment Summary

48. Agency or Organization:	49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):																				50. Additional Personnel not assigned to a resource:	51. Total Personnel (includes those associated with resources – e.g., aircraft or engines – and individual overhead):			
52. Total Resources																									
53. Additional Cooperating and Assisting Organizations Not Listed Above:																									
ICS 209, Page ____ of ____												* Required when applicable.													

After Action Review

Date: _____ Conducted by: _____

What was planned?

What actually happened?

Why did it happen?

What can we do next time?

Is there a need to file a SAFENET or SAFECOM? No ☐ Yes ☐

Wildland Fire Accidents? No ☐ Yes ☐

If Yes, specify below:

JUSTIFICATION FOR SHIFTS IN EXCESS OF 16 HOURS/2:1

The following criteria has been determined to justify working shifts exceeding 16 hours and/or consecutive days that do not meet the 2:1 work rest guidelines.

FIRE NAME _____ **FIRE #** _____

EMPLOYEES

NAME	NAME

_____ Shifts in excess of 16 hours/ exceeding 2:1 on _____ (Date) was due to establishing initial control of the fire.

_____ Shifts in excess of 16 hours/ exceeding 2:1 on _____ (Date) was due to dispatching manpower and resources during critical fire situation.

_____ Shifts in excess of 16 hours/ exceeding 2:1 on _____ (Date) was due to emergency rescue work.

_____ Arduous travel. Travel on overtime necessary because suitable subsistence and lodging not available to remain until following day. *(May be applicable when returning from fire.)*

_____ Travel time not administratively controllable. Required to return to home unit as quickly as possible and by most expedient method because of fire situation. *(May be applicable when returning from fire detail assignment.)*

_____ Other:

_____ Mitigation measures used to reduce fatigue (requirement):

NUIFC INITIAL ATTACK FREQUENCY PLAN

The following frequencies are assigned by NUIFC for initial attack fires within the dispatch area. Although 800 MHz systems are being used within the NUIFC area, they are not assigned by NUIFC and will not be used for interagency tactical or command frequencies. All 2016 frequencies are Narrowband.
